**Subject : All India One Day Seminar on "Techno-Economic Viability of Sugarcane Juice or B-Heavy Molasses as Alternate Feedstock for Ethanol Production" at National Sugar Institute, Kanpur on Tuesday, 16<sup>th</sup> October 2018.**

Dear Member,

India ended the sugar season 2017-18 producing 32.3 million tonnes (MT) of sugar against the consumption of 25 MT. In the sugar season 2018-19 the country is likely to produce around 35.5 MT of sugar which would lead to huge inventory and cane arrears. To avert the crisis & assist the industry, the Central Govt. has hiked the procurement ex-mill price for ethanol production from the following :

Raw Material	Old Price Rs. / Lit.	New Price Rs. / Lit.
Cane Juice	47.49	59.19
B-Heavy Molasses	47.49	52.43
C-Heavy Molasses	43.70	43.46

In June 2018, the Central Govt. had also announced a soft loan of Rs.4440 crores to mills for creating ethanol capacity and also promised to bear an interest subvention of Rs.1332 crores. In the present scenario, production of ethanol through direct Sugarcane Juice or through 'B' heavy molasses is not only a profitable proposition but this will also sap the excess sugar production to maintain balance in sugar production.

To discuss more on the subject, **The Sugar Technologists' Association of India (STAI) in association with National Sugar Institute (NSI), Kanpur** are organizing the above seminar as per following programme :

Date : Tuesday, 16th October 2018
