Subject : All India STAI – SISSTA Joint Seminar on “Air and Water Pollution Control and Monitoring in Sugar Industry and Distilleries”, 17th February 2018, Chennai

Dear Member,

In recent years, environmental degradation has become a matter of great concern worldwide due climate change, ozone layer depletion, air and water pollution etc that affect every human on this planet. The sugar industry also consumes large quantity of water in manufacturing process which results in huge wastewater generation and it has adverse impact on ecosystem & environment due to higher BOD load and high level pollutants.

Management of Effluent, Wastewater and Solid Waste Management has always been a priority for the industry. Several measures like implementation of environment management system, ZLD, installation of incineration boilers, establishment of bio compost plants, community programmes have been taken to improve economic and environmental performance of sugar processing units.

To discuss more on the subject and explore new technological strategies to mitigate environment impacts, **The Sugar Technologists' Association of India (STAI)** and the **South Indian Sugarcane and Sugar Technologists Association** are jointly organizing an All India Seminar on “**Air and Water Pollution Control and Monitoring in Sugar Industry and Distilleries**” as per following programme :
